**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method of making a ceramic material.

Group II, claim(s) 8-15, drawn to a ceramic material.

Group III, claim(s) 16-29 and 31, drawn to a component/electrolytic cell using the component.

Group IV, claim(s) 30 and 33, drawn to a method of electrowinning.

Group V, claim(s) 34, drawn to an arc furnace.

Group VI, claim(s) 35, drawn to a method of operating the arc furnace.

Group VII, claim(s) 36, drawn to an apparatus for treating aluminum.

Group VIII, claim(s) 37, drawn to a method of treating aluminum.

2. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the only common feature of the eight groups is the production of a ceramic material which is made from a porous sintered skeleton of boride, aluminide and/or oxycompounds (i.e.-oxides) into which is infiltrated an iron oxide or an iron oxide precursor. Such method of formation of a ceramic material was however known in the prior art, especially from the teachings of Fujitani et al (US 4,299,473). Therefore, the common feature of the different groups cannot be a special technical feature because it does not provide a contribution over the prior art.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
